

Specification Sheet

Underlam Floor System

Product Description:

Underlam is designed for use under laminate or hardwood floors to reduce impact noise. This 7mm thick dense foam underlay is ideal for use under hard floor finishes and is quick and easy to install.

Underlam is supplied in linear metres with a roll width of 1610mm. Underlam would then be installed on to any floor surface, making sure that the floor is cleared of any dust or debris. The laminate or hard wood floor can then be installed directly on to the Underlam.
