

CUBE

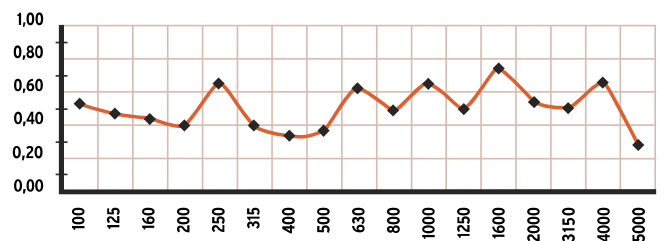

ideatec
advanced acoustic solutions

FEATURES

- Customised design, according to frequency needs.
- **600x600 mm** cube of **MDF** or **hard wood**, **RAL** or **varnished finish**.
- Fire resistant **MDF** boards are also available.
- **Estimated weight:** 4.70 kg (10.36 lb.) per cube.

SCATTERING COEFFICIENT

Frequency (Hz) Simulation in our own laboratories

FUNCTION

Acoustic reflection: minimum sound absorption, lower than **0,2 sabins** from absorption coefficient. Very high reflection.

Acoustic diffusion: Due to its design, sound waves hit and reflect evenly.

STANDARD FINISHES

MAPLE

CHERRY

OAK

WENGE

BEECH
