

## Egg Box Foam

### **Description:**

Eggbox Profile Foam is a flexible open cell polyurethane foam post treated with flame retardants, particulate fillers and a polymeric bonding agent, which offers class "O" non flammable fire performance and sound absorbing qualities.

### **Specification**

Double Sided Non Woven Tape designed for bonding to synthetic foams. Modified Acrylic adhesive with an integral (removable) release liner. The blue/green liner weight is 100gsm and offers easier removal. The product has high initial tack and good elevated temperature, plasticiser and shear resistance.

Physical Property method	Specification	Test
Adhesion to Pyrosorb-S	1000 N/m (Minimum)	ATM.1-PSTC.1
Adhesion to Steel	1000 N/m (Minimum)	ATM.1-PSTC.1
Adhesion to other substrates	Available on request.
